

APT, Inc.
Strategies for Talent Management

Join our team of industrial/organizational psychologists and enjoy a continuous learning experience in a fast-paced, team-oriented environment!

APT, Inc. is looking for consultants whose innovation, initiative, and commitment to excellence will contribute to the continued growth of our firm. Our consultants work to deliver extraordinary service and customized products to our Fortune 100 clients.

APT, Inc. is a human resources consulting firm comprised of industrial-organizational psychologists and human resource professionals. Since 1995, the Fortune® 100 and other organizations around the world have trusted *APT, Inc.* to deliver unparalleled service in the areas of: job analysis; selection; litigation support; performance management; staffing for mergers and acquisitions; leadership assessment and development; 360-degree feedback; organizational surveys; and compensation. For more information, visit www.APTMetrics.com.

Principal Duties and Responsibilities:

Primary responsibilities of this position include supporting and executing consulting project activities. This includes developing content for client solutions (e.g., test items) and other project-related materials, writing technical documentation, summarizing materials for litigation support, and conducting and reporting statistical analyses. Individuals in this position also facilitate various types of focus groups. Consultants communicate with consulting team members to delegate project-related activities and may work directly with clients to discuss project-related issues.

Candidate Profile

Ph.D. or Masters Degree in industrial-organizational psychology or related discipline

One to two years of human resources consulting or corporate I-O or HR-related experience

Strong customer focus, project management, interpersonal, communication and writing skills

Experience with executing multi-faceted projects in one or more of the following areas: job analysis, selection and assessment, performance management, survey research or training and development

Experience with statistical software packages (e.g. SPSS, SAS)

Compensation is commensurate with qualifications and experience. We offer competitive salaries that include health benefits, 401K, and pension plans.
